

QUEEN MARY UNIVERSITY OF LONDON — Computer Science (G400)

1. University Rankings

- **Primary:** <https://www.qmul.ac.uk/undergraduate/course-info/computer-science/>

10th in the UK for Computer Science: (Times Higher Education, 2025).
Top 100 in the world for Computer Science and information Systems: (QS World Subject Rankings 2026)
£35,139 is the average starting salary for our graduates (GOS 2024)

2. Entry Requirements

- **Official**
2026: <https://www.qmul.ac.uk/undergraduate/coursefinder/courses/2026/computer-science>

Entry requirements

A-Level	Grades AAA at A-Level. This must include one of A-Level Mathematics, Computer Science, or
IB	International Baccalaureate Diploma with a minimum of 36 points overall, including 6,6,6 from subjects. This must include either Mathematics, Computer Science, or Physics at Higher Level either Mathematics: Applications and Interpretation or Mathematics: Analysis and approach
BTEC	See our detailed subject and grade requirements
Access HE	We consider applications from students with the Access to Higher Education Diploma in Com minimum academic requirement is to achieve 60 credits overall, with 45 credits at Level 3, of must be at Distinction and 12 credits at Merit or higher. Applications are considered on a case to the high volume of applications, we do not make offers of study purely on the basis of mee requirements. GCSE Mathematics at grade B/5 is required in addition to the Access qualificat
GCSE	Minimum five GCSE passes including English at grade C or 4 and Maths at grade B or 5.
EPQ	Alternative offers may be made to applicants taking the Extended Project Qualification. For further information please visit: qmul.ac.uk/undergraduate/entry/epq
Contextualised admissions	Our standard contextual offer: ABB including one of Maths, Physics or Computer Science at A Our enhanced contextual offer: BBB including one of Maths, Physics or Computer Science at A

	More information on our contextual offer criteria can be found on our contextualised admissions page. Please note that General Studies and Critical Thinking are excluded from any A-Level offer and are not considered.

Teaching

Teaching and learning

You'll spend 15 to 20 hours per week in lectures, laboratory sessions and tutorials. You will also be expected to complete additional hours of independent study. You'll meet with your personal advisor regularly to ensure that you are settling in and progressing well.

Assessment

Assessment typically includes a combination of coursework (presentations, assignments, essay report writing, in-class tests, research and project work) and/or examinations in May or June.

Individual and group projects are assessed through a written report, practical demonstration and oral examination.

Resources and facilities

As a student, your home will be the Mile End campus. You'll spend lots of time in our newly refurbished Informatics Teaching Lab (ITL), which is exclusively for Electronic Engineering and Computer Science students. This lab has recently undergone a £20 million refurbishment, which will be completed in January 2026. Students joining in September will be among the first to use this new facility.

The labs are open seven days a week, generally between 8am and midnight. Students can also gain remote access to the School's computing facilities 24-hours a day. We also have a number of students employed as 'module demonstrators', who are available in labs to help first and second-year students to navigate software and programming tools.

UNIVERSITY OF BRISTOL — Computer Science

6. Fees & Cost

- **Official course:**
- <https://www.bristol.ac.uk/study/undergraduate/2025/computer-science/bsc-computer-science/>

Fees

Home students, £9,790 for the first year.

International students, £33,400 for the first year.

Fees are subject to annual review and are liable to rise each year.

Home fees will be set in line with UK government policy and updated as per their guidance, while international fees increase annually in line with expected inflation rises.

University Rankings —

- **Official hub:** <https://www.bristol.ac.uk/university/rankings-reputation/>
Complete Guide 2026: 17 national, QS World 57 (8 UK), Guardian 15, THE 80
Rankings and reputation

Bristol consistently ranks in the world's top 100 and UK's top ten universities in league tables that draw on information about both research and teaching excellence.

We are one of the most popular UK universities, attracting on average eight top-quality applicants for every place, and our graduates are among the most sought-after by employers across the globe.

[Top ten UK university \(QS World University Rankings 2027\)](#)

[Top five university for research \(2021 REF\)](#)

[Home to the top start-up hub in the UK and Ireland \(FT Statista 2024\)](#)

[The 6th most targeted by top UK recruiters \(High Fliers Research 2026\)](#)

[25 subjects highly ranked in the world's top 100 \(QS World Subject Rankings 2025\)](#)

[13 Nobel Prize Winners linked to the University - including our current Chancellor, Sir Paul Nurse](#)

[Joint seventh for UK graduate employability \(QS Graduate Employability Rankings 2022\)](#)

[Ranked ninth in Europe for teaching](#)

[University of Bristol alumni are among the highest paid graduates in the UK](#)

Over 40 per cent of our teaching programmes are accredited by professional bodies, who consistently acknowledge the excellence of our research-rich curriculum, our learning environment and our learning outcomes.

The review processes undertaken by these bodies are extremely detailed and are conducted by leading academics and practitioners. For more information please see our [Professional Statutory and Regulatory Bodies page](#).

UNIVERSITY OF BRISTOL — Computer Science

6. Fees & Cost —

- **Official course:** <https://www.bristol.ac.uk/study/undergraduate/2025/computer-science/bsc-computer-science/>

Studying at university is one of the most significant investments you will make. The University will provide the support you need to take control of your finances. The two main costs you will face as an undergraduate student are tuition fees and living expenses. [Find out more about the financial help and support available.](#)

Tuition fees

Fees are subject to annual review, so they may be liable to rise each year in line with UK government policy / inflation.

Home students (UK, Channel Islands and Isle of Man)

Home tuition fees for each degree course are listed in the [online course finder](#).

Current UK government guidance suggests that future fees will be set at the rates below. These rates are subject to change and future years (2027/28 onwards) will be confirmed annually.

- 2025/26: £9,535 (confirmed)
- 2026/27: £9,790 (confirmed)
- 2027/28: £10,050 (to be confirmed)
- 2028/29: £10,316 (estimate)
- 2029/30: £10,595 (estimate)
- 2030/31: £10,881 (estimate)

Overall:

- Students starting in 2025 can expect to pay around £29,375 for a three-year course.
- Students starting in 2026 can expect to pay approximately £30,156 for a three-year course.
- Students starting in 2027 can expect to pay approximately £30,961 for a three-year course.

Details will be updated as per latest government guidance.

Contact your local education department for further details about financing your studies and, if applicable, for advice on whether your island government offers any grants or awards:

- [Island of Jersey](#)
- [States of Guernsey](#)
- [Isle of Man](#)

International students (including EU)

If you are an international student, your tuition fees will depend on the [course you study](#).

International fees are reviewed annually and will generally increase by inflation each year of study, capped at a maximum of 8%. This increase does not apply to clinical courses.

If you're unsure which fees you should pay, read about how we determine your [fee status](#).

Transferring students

If you are transferring to the University of Bristol from another institution, you will be charged the same fee as a new student, regardless of the year of the course you are joining.

Deferred students

Students with deferred entry will be charged the fee for the year they start their studies.

Part-time courses

If you are studying an undergraduate course part time, your tuition fee will normally be pro rata the full-time fee for the course.

Foundation year courses

Students on the one-year Foundation in Arts and Social Sciences or the Foundation in Science, Engineering and Mathematics courses may be eligible for a tuition fee loan and maintenance loan. Find out more about the [financial support available for Foundation Year students](#).

Study abroad, work abroad and industrial placement fees

If you are spending time away from the University for a placement as part of your course, you will be charged a [reduced tuition fee](#) during the relevant academic year.

For example, in the 2025/26 academic year, home students on full-year study and work abroad or industrial placements were charged 15% of the total tuition fee. International students on full-year study and work abroad placements were charged 50% of the total fee, and those on whole-year industrial placements were charged 25% of the total fee. If you undertake a placement for less than a full academic year, your tuition fee will not be affected.

Intercalating students

If you are an incoming external intercalating student, you will be charged the same fee as a new student.

If you are an existing University of Bristol student intercalating onto a different course within the University, find out more about [Intercalated degree course fees](#).

University of Bristol students intercalating at Bristol or at a different university will be treated as continuing students on their return and therefore charged at the same continuing rate.

Paying your fees

You must pay your first tuition fee instalment when registering at the University. Find out [how and when you can pay your tuition fees](#).

Fees for resits

We *will not* charge an extra tuition fee if you:

- complete resits or supplementary assessments in the same year of study that you take the unit.
- take a supplementary year during which you engage with the content of unit(s) from home and only attend the university for assessment.
- take extra unit(s) in a year of study to meet the requirements of conditional progression.

We *will* charge a tuition fee if you:

- take a supplementary or repeat year, during which you attend the university for teaching and assessment.
- take extra unit(s) in a year, beyond those the university requires.

The fee will be a proportion of a standard fee, based on the credit point value of the unit(s) you study, in line with Student Loans Company (SLC) guidance.

For example:

- In the 2025/26 academic year, an undergraduate home student takes a supplementary year.
- They attend the university to take three 20 credit point units; they study a total of 60 credit points in that year.
- In the 2025/26 year, tuition fees are £9,535. A standard year of study has a total value of 120 credit points.

- $60 \text{ credit points} \div 120 \text{ credit points} = 0.5$. This is the proportion of credits compared to a standard year.
- $0.5 \times £9,535 = £4,767.50$. This is the amount the student would be charged for the supplementary year in this example.

Living expenses

[Budgeting and living expenses](#) cover everything you will need to pay for, other than tuition fees. The amount you spend will vary and depend on your lifestyle.

As a guide, most students spend between £9,000 and £15,000 per year including accommodation.

Financial help and support

If you have the talent and ability to succeed at Bristol, concerns about funding your studies should not stop you from applying.

The University offers a comprehensive package of [financial support](#) to students from low-income backgrounds, in addition to the support provided by the UK government.

The following services are also available to help you manage your money:

- Our [Money Advice and Funding](#) team can provide you with information on bursaries and scholarships as well as advice on budgeting.
- The [Careers Service](#) can help you find suitable part-time or holiday work.
- Our [Disability Services](#) team can advise on funding to pay for specialist study support.

Artificial Intelligence and Computer Science (BSc Hons) | £1,820 Scotland | £9,535 RUK
| £36,800 International
- **Living costs £1,546/month:** <https://study.ed.ac.uk/programmes/undergraduate/66-artificial-intelligence-and-computer-science>

Full-time fees for new students 2025-2026

Tuition fees for full-time undergraduate study if you are starting your studies in 2025-2026.

Annual tuition fee increase

The tuition fee shown in the table is for one year only.

Rest of UK, including Republic of Ireland and Channel Islands (RUK) full-time student fees

In November 2024, the UK government announced plans to increase tuition fee caps in line with inflation. The University's tuition fee for RUK full-time students for academic

year 2025-2026 will be £9,535, which is a £285 increase on the current fee rate for academic year 2024-2025.

International full-time student fees

If you are an Overseas/International taught student studying full-time over multiple years, you will:

- *not be affected by the annual tuition fee increase*
- *be charged a fixed annual fee based on your start date*

If you are given direct entry into Year 2 or Year 3, you will be charged the same annual rate as the year group that you join.
